IM Gestão de Ativos is authorised in **Portugal** and is subject to supervision of the **Portuguese Securities Market Commission (CMVM)**. This Fund, established on July 7th, 1995 with undetermined duration, is authorised in **Portugal** and is subject to supervised by the **(CMVM)**, including this Key Information Document.

The information included in this document is accurate as of 7 December 2026.

WHAT IS THIS PRODUCT?

Type: Open-Ended Equity Fund

Term: Indeterminate duration

Reference currency: Euro

Objectives:

The Fund aims to provide unitholders with an appreciation of the invested capital, obtaining gains through the appreciation of the shares of listed companies in the Portuguese stock market.

Investment policy: To carry out this policy, the Fund will invest its capital, directly or indirectly (namely through certificates), in equities of Portuguese companies and may also invest up to a maximum of 20% of its total net value in shares of companies in the Eurozone, listed on regulated markets operating in EU countries and in some Organisation for Economic Cooperation and Development (OECD) countries.

The Fund must permanently have a minimum of 85% of its net asset value invested in equities.

The Fund does not seek preferential exposure to any specific activity sector.

The Fund may use financial derivative instruments to cover risks and for additional exposure, without this resulting in an exposure to the underlying assets exceeding 100% of its net asset value.

The Fund's investment strategy follows an active management approach, without considering any reference benchmark. Assets are selected on the basis of growth and valuation criteria, taking into account the companies' financial results, sector of activity, market positioning, management quality, among others, favouring companies that adopt best practices in terms of Government, Human Rights and the Environment in the investment universe, and refraining from investing in entities whose majority of revenues come from activities in controversial sectors, namely gambling, controversial weapons, tobacco and thermal coal.

Benchmark: The Fund does not adopt a benchmark.

Dealing frequency: The unit value of the Fund is calculated and published on a daily basis. Unitholders may subscribe or redeem units on any business day in accordance with the Portuguese banking calendar. The unit value for subscription or redemptions is the unit value that will be determined at the end of the day on which the request is submitted, so it is made at an unknown price. The minimum subscription amount is 100,000 €.

Redemption notice period: 4 business days.

Distribution policy: Because it is a capitalisation Fund, the income generated by the Fund's portfolio is reinvested in the Fund.

Depositary: Banco Comercial Português, S.A., headquartered at Praça D. João I, 28, 4049-060 Porto, Tel.: +351 220 040 000

The unitholders may be provided, by the Management Company and the Distributors, on a durable medium or through a website, and regardless of the Fund's distribution method, the Prospectus, the annual and half-yearly reports and accounts, free of charge, on paper, to those who request it. These documents are available in Portuguese.

The Management Company shall disclose the daily value of the units in its office, to those who request it, and in the branches, on the websites and in the telephone banking system of the distributors. The value of the fund unit shall also be published daily in the Portuguese Securities Market Commission CMVM (www.cmvm.pt). This disclosure shall always be made on the business day following the reference day for calculation of the value of the unit.

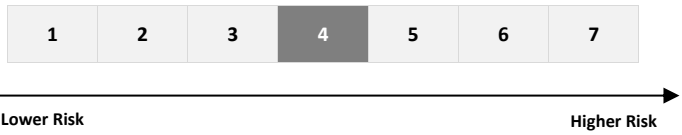

Intended retail investor:

The Fund is adjusted for investors with tolerance to bear eventual capital devaluation in the short term, as well as investors with stable asset situations, that aim to accrue profitability provided by the national equity market.

What are the risks and what could I get in return?

Risk Indicator

The shaded area of the scale below shows the Fund's risk rating.

The risk indicator assumes you keep the product for 3 years (recommended holding period).
The actual risk can vary significantly if you cash in at an early stage and you may get back less.

The summary risk indicator is a guide to the level of risk of this product compared to other products. It shows how likely it is that the product will lose money because of movements in the markets. We have classified this product as 4 out of 7, which is a medium risk class.
This product does not include any protection from future market performance so you could lose some or all of your investment.

Performance Scenarios

These scenarios are the provision of the Fund's prospective performance based on past performance information and illustrate what annual product return might be. What you will get from this product depends on future market performance and cannot be accurately predicted. The stress scenario shows what you might get back in extreme market circumstances.
The figures shown include all costs of the product itself and have no tax impacts, specifically in terms of income taxation.

Recommended holding period:		3 years	
Example Investment:		10 000 EUR	
SCENARIOS		If you exit after 1 year	If you exit after 3 years (1)
Minimum	**There is no minimum guaranteed return. You could lose some or all of your investment.**		
Stress Scenario	What you might get back after costs	7 255 EUR	8 812 EUR
	Average return each year	-27,45%	-11,88%
Unfavourable Scenario	What you might get back after costs	7 255 EUR	8 812 EUR
	Average return each year	-27,45%	-11,88%
Moderate Scenario	What you might get back after costs	10 856 EUR	10 603 EUR
	Average return each year	8,56%	6,03%
Favourable Scenario	What you might get back after costs	15 196 EUR	12 017 EUR
	Average return each year	51,96%	20,17%

(1) recommended holding period.

Unfavourable, moderate, and favourable scenarios constructed based on the minimum, average, and maximum historical returns of the Fund over the past 10 years, or from a portfolio of assets representative of its investment universe, in the event that 10 years of historical data is unavailable, for an investment with the same duration as each of the periods represented.
The stress scenario is based on a statistical method (Cornish-Fisher expansion), which cannot be better than the unfavourable scenario.
These calculations are made in accordance with the Delegated Regulation (EU) 2021/2268, regarding technical criteria for the content and presentation of performance scenarios.

WHAT ARE THE COSTS?

The person advising on or selling you this product may charge you other costs. If so, this person will provide you with information about these costs and how they affect your investment.

Costs over time

The tables show the amounts that are taken from your investment to cover different types of costs. These amounts depend on how much you invest, how long you hold the product. The amounts shown here are illustrations based on an example investment amount and different possible investment periods.
The scenarios presented consider an investment amount of EUR 10,000 and assume a 0% return considering the scenario of exit after 1 year, and the same performance as the moderate scenario to the other holding period. The figures are estimates and may change in the future.

	If you exit after 1 year	If you exit after 3 year (1)
Total costs	255 EUR	764 EUR
Annual cost impact (2)	2.5%	2.5%

(1) Recommended holding period.

(2) Illustrates the impact that total costs could have on your investment over the indicated holding period. For example, it shows that if you exit at the recommended holding period your average return per year is projected to be 8.6% before costs and 6.0% after costs.

Composition of Costs

One-off costs	Entry costs	0%	Not applicable
	Exit costs	0%	Not applicable
Ongoing costs	Management fees and other administrative or operating costs	2.40%	Estimated costs that the Fund will bear over the year based on actual costs charged to the Fund over the last year.
	Transaction costs	0.15%	This is an annual estimate of the costs incurred when we buy and sell assets, calculated as the average cost over the last 3 years based on implicit costs, calculated as the difference between bid or offer price of each traded asset and its average value at the time of the transaction, and the mid-value at the time of the deal, at the market opening or the closing of the previous day and explicit costs, such as brokerage commissions.
Incidental costs	Performance fees	0%	Not applicable

WHAT HAPPENS IF THE FUND IS UNABLE TO PAY OUT?

This product is not covered by an investor compensation or guarantee scheme. Pursuant to article 12º of the Asset Management Framework (AMF), this product has asset autonomy thus it shall in no case be liable for the debts of the unitholders, of the management company, depositary, distributors, or of other collective investment undertakings, but it is only liable for the debts of its assets.

HOW LONG SHOULD I HOLD THE FUND? CAN I TAKE MONEY OUT EARLY?

Recommended holding period: The minimum recommended investment period is 3 years. The units may be redeemed on any business day and their value for redemption purposes is the unit value that will be determined at the end of the day on which the request is submitted, so it is made at an unknown price redemption fee applied. The likelihood of capital losses decreases the longer the investment duration is.
Under exceptional circumstances, subscriptions or redemptions may be suspended by the Management Company, in the interest of the unitholders, in accordance with item 7 of Charter III under Part I of the Prospectus, provided immediately communicated to the CMVM or, by decision of the CMVM, in the interest of the unitholders or in the public interest.
